

India Exporters & Global Trade Services Platform SOW & Proposal

Date: 11th Aug, 2026

1. Project Overview

Kkeydos will develop a **B2B India Exporters & Global Trade Services Platform** that enables international importers, especially Gulf-region customers, to find Indian exporters and access related legal documentation and shipping services.

The platform will be developed for **Web, Android and iOS**.

2. Technology Stack

- **Frontend:** Next.js
- **Backend:** Node.js
- **Database:** MongoDB
- **Cloud:** AWS
- **Mobile:** Flutter

3. Core Features

India Exporters Library

- Integration with Volza/trade-data API or approved equivalent.
- Integration with contact-data enrichment API.
- Exporter search by product, category and HS/HSN.
- Exporter profiles.
- Business mobile number and email wherever available through licensed data sources.
- Data source and verification information.
- Exporter data management through Admin.

Subscription

Two subscription plans:

- HS/HSN-Based Subscription
- Full Database Access – Monthly Subscription

Features include registration, subscription management, payment and access control.

Legal Services

- Dedicated Legal Services section.
- Promote client's in-house legal documentation services.
- Option to display/promote additional legal service providers.
- User enquiry/request functionality.

Shipping Services

Integration with **up to 4 shipping/logistics partner APIs** to display available shipping services.

Depending on API capabilities, information may include:

- Shipping provider
- Rate

- Service type
- Estimated delivery
- Tracking
- Booking option, where supported by the API

Payment & Notifications

- Payment gateway integration
- SMS API integration
- Email API integration
- Push notifications for mobile application

Languages

- English
- Urdu

4. Mobile Application

Flutter-based Android and iOS application including:

- Login/registration
- Subscription
- Product/exporter search
- Exporter profiles
- Shortlisting
- Legal services
- Shipping services
- Notifications
- Language selection

5. Admin Panel

Admin will be able to manage:

- Users
- Exporters
- Products/categories
- HS/HSN data
- Subscriptions
- Payments
- Legal services
- Shipping partners
- API configurations
- Basic reports/content

6. Project Timeline

45 working days

The timeline starts after receipt of all required:

- API credentials
- Payment gateway access
- Shipping API access
- SMS/Email API access

- Content
- Branding materials
- Required approvals

Delays caused by third-party API providers, payment gateways, app-store approvals or delayed client inputs will extend the delivery timeline accordingly.

7. Third-Party Costs

The client will bear all third-party charges including:

- Volza/trade-data API
- Contact enrichment API
- 4 shipping APIs
- Payment gateway charges
- SMS API
- Email API
- AWS/cloud charges
- Google Play Developer account
- Apple Developer account
- Other third-party services/licenses

The client is responsible for ensuring that all third-party data APIs provide the necessary commercial usage and redistribution rights for the subscription-based platform.

8. Scope Limitation

Any additional features, integrations, APIs beyond the agreed 4 shipping APIs, major changes to approved requirements, or additional modules will be estimated and charged separately.

9. Delivery

Kkeydos will provide:

- Web application
- Android application
- iOS application
- Backend/API
- Admin panel
- AWS deployment
- Testing and bug fixing
- Production deployment and basic handover

Thank You

Building the Future, One Digital Experience at a Time.

Thank you for considering **Kkeydos Info Tech Pvt. Ltd.** as your trusted technology partner.
